

Let's Go GREEN!

CONTROLLING PEST

Harmless to "man + environment"

SAFE &
Eco-Environmentally
Friendly

“Imagine pest control
safer than
‘teh tarik and roti canai”

“Ideally, any pesticide will act rapidly on pests, yet be completely harmless to people, domestic animals, wildlife and other aspects of the environment.”

“The Ideal Pesticide”

Truman’s Scientific Guide to Pest Control Operations 1997 5th Edition

GREEN-X is a treatment for the control of *insects, viruses, pathogens and bacteria*. Green-X is safe for humans and environment.

It is recommended for homes, hospitals, kindergartens, hotels, restaurants, factories, labs, offices, poultry farms, rice mills and virtually anywhere where insects, viruses, pathogens and bacteria need to be eliminated.

After GREEN-X treatment, your place will smell fresh and clean. There is also no need to clean up¹ and no worry of contamination.

WHO: Etofenprox
“Unlikely to Present
Acute Hazard in
Normal Use”

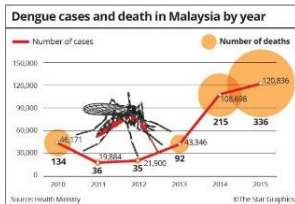

US EPA: Etofenprox
“Not likely to be
carcinogenic to humans”

GREEN-X

All-in-One

Mosquito & larvae

GREEN-X can exterminate adult mosquito and larva at the same time. The treatment will cover all surfaces where mosquito may rest.

Totally safe and no need to clean up. Your room will also be deodorized!

Bed bug, flea & tick

After GREEN-X bed bug treatment, you can use your bedroom after only 2 hours.

For flea & ticks, we can treat your pets and surrounding easily.

Cockroach

No matter how bad the infestation is, GREEN-X will exterminate without causing any harm to humans and environment. There is no need to worry about contamination!

And the best benefit, your place will smell fresh & clean!

GREEN-X

Ideal for

Homes & Offices

Hotels & Resorts
