

# BED BUG

SLEEP TIGHT

•  
DON'T LET THE  
BED BUG BITE

## Where Bed Bugs Hide

- \* Around the bed, they can be found near the piping, seams and tags of the mattress and box spring, and in cracks on the bed frame and headboard.
- \* In the seams of chairs and couches, between cushions, in the folds of curtains.
- \* In drawer joints.
- \* Under loose wall paper and wall hangings.

Since bed bugs are only about the width of a credit card, they can squeeze into really small hiding spots. If a crack will hold a credit card, it could hide a bed bug.

WHO: Etofenprox  
"Unlikely to Present Acute  
Hazard in  
Normal Use"

US EPA: Etofenprox  
"Not likely to be  
carcinogenic to humans"

## GREEN-X TREATMENT IDEAL FOR BED BUG CONTROL

1. 'Safer than table salt'
2. No need to clean up
3. More durable
4. No need to stay way
5. EPA approved
6. Proven effective
7. Anti-bacteria anti virus
8. Safe for human & environment
